Naranjo

ABOUT THE ARTIST

Fernando Naranjo Espinoza, born in Guayaquil, Ecuador, develops his work through drawing, illustration, and painting as a way of exploring the fragile boundary between reality and imagination. Since his first professional exhibition in 1997, he has built a refined visual language defined by precision, atmosphere, and a subtle narrative depth, through which he portrays a world waiting to be discovered.

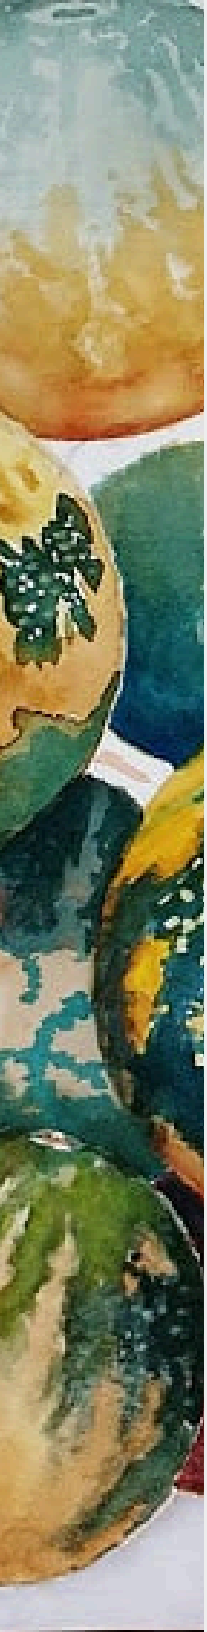

Influenced by Gustav Klimt, Francisco de Goya, and the Pre-Raphaelite Brotherhood, his practice merges classical sensibility with a contemporary vision that seeks meaning in the everyday — in traces of movement, memory, and connection.

Working primarily with watercolor, acrylic, pastel, and crayon, his landscapes, portraits, and atmospheric compositions evoke spaces that feel both intimate and dreamlike, inviting a distinctly human gaze — slower, more contemplative, and deeply reflective.
